Price USD: \$579.00

# THE LEMOND REVOLUTION™ WITH DIRECT DRIVE

Technology that makes roller-based trainers obsolete.

**THE WAIT IS OVER  
ORDER NOW**

## PRODUCT OVERVIEW

Introducing the LeMond Revolution, a direct-drive indoor bike trainer that integrates directly with your bike's drive train. By simply removing your rear wheel and slipping the trainer into your dropouts, it replaces the need for mushy, slippery tire-to-roller connections, while eliminating wheel and tire wear and tear.

### Realistic Road Feel

The Revolution bike trainer features High-Inertia Technology (HIT), designed with a large, weighted fly wheel that mimics the inertia of a rolling bicycle. The Revolution spins freely when the pedals aren't engaged, and delivers progressive wind resistance similar to real-world conditions.

### Ease of Use and Cost Savings

The Revolution indoor bike trainer fits all road bikes and works seamlessly with your mountain bike or winter-specific cross bike. Simply remove the back wheel, attach the rear dropouts to the spindle and go. No more tire slippage and wear, front wheel blocks or unstable platforms. Plus save \$50 to \$100 a year by not having to replace worn out rear tires.

### Choice of Pros

The LeMond Revolution is the official bike trainer of Team Garmin-Cervélo. Tested by riders like Dave Zabriskie, Christian Vande Velde and Tyler Farrar in the harshest and most competitive cycling environment. [See More](#)

## 2 Models to Choose From

The LeMond Revolution can be ordered direct from LeMond Fitness – sold with or without a SRAM/SHIMANO compatible cassette.

## Product Specifications
